

PX Précinox SA joined the RJC in 2006 within the precious metals trader, refiner and/or hedger forum. This is their fifth certification, based on an audit conducted on 20 – 22nd of November 2023. The below summary of audit findings complements the Member's current RJC certificate **No 0000 5167**.

Audit objective, activities, and methodology

The objective of the audit was to review the member's systems and processes to establish whether they conform to the RJC Code of Practices (COP) 2019. The audit activities included planning, conducting the audit and reporting on conformance, including corrective actions approval, as per the RJC Assessment Manual. The audit consisted of collecting / sampling and reviewing objective evidence including documentation, management and employee interviews, facility walk-through, and other observations, in relation to at least the previous 12 months.

The auditors confirm that:

- The information provided by the member is true and accurate to the best knowledge of the auditor(s) preparing the report.
- The findings are based on verified objective evidence relevant to the time period for the audit, traceable and unambiguous.
- The audit scope and audit methodology are sufficient to establish confidence that the findings are indicative of the performance of the member's defined certification scope.
- The auditor(s) have acted in a manner deemed ethical, truthful, accurate professional, independent and objective.

		<p>relevant business customers has occurred. Adequate tracking systems and records about sourced materials including its origin where appropriate, whether internally or from upstream suppliers including refiners / miners, if relevant, was observed. Member defined CAHRAs, had an established process to identify risks and a grievance mechanism available on website. Namely, the Member had a due diligence management system in place in accordance with the 5 steps OECD, including a policy endorsed by senior management and Know Your Counterparty (KYC) forms. Before opening a new commercial relationship, the Member identified the counterparty and its stakeholder using several enquiry documents including LBMA toolkit Questionnaire for sources. Its KYC forms were compliant with Swiss AML law and LBMA Responsible Gold Program. Regarding high-risk supply chains, the Member has defined criteria to determine high-risk situation in compliance with LBMA Responsible Gold Program.</p> <p>OECD Step 2: The Member identified and assessed risks, including identification and mapping of red flags. Records were available to support risk assessment. Namely, the Member was keeping a detailed follow-up on the reception of the KYC forms, the signed codes of conduct and a risk analysis for each supplier. For high-risk categories, several additional investigations were performed (enhanced due diligence) such as on-site audit by a graduate auditor or recognized auditing company. In case of individuals, a face-to-face meeting is organised to evaluate the economic background. High risk counterparties were considered but not limited to counterparties that operate in or with a CAHRA or have a Politically Exposed Person as a beneficial owner or as a member of the highest governance body of their counterparty. The Member had a work instruction with each category to evaluate the main risk and how to prevent or mitigate those risks.</p> <p>OECD Step 3: Identified risks were reported to management, as applicable. A risk strategy has been developed and implemented to support management of risks, including any actions taken as per risks/red flags (if applicable). Performance against risk strategy was monitored. Namely, the Compliance officer was communicating regularly to Senior management and to the Board committee about the high-risk supply chains. Moreover, the Member has put in place the "RS Committee" (Responsible Sourcing Committee) with members from the Board of Directors, Senior Management, Compliance officer and members from operational and strategic roles in the company. The RS Committee was meeting several times a year to discuss about the sourcing, the risks and the strategy to adopt. Depending on the result of risk assessment, the Compliance Officer in cooperation with Senior Management could decide to reject or to suspend the commercial relationship or close it. The Member has identified mine of origin for the mined gold, with most material being sourced from Peru, followed by other</p>

The audit firm was also annually reviewing these due diligence files during the annual LBMA audit. The Member has not identified other high risks in its supply chain.</p> <p>OECD Step 4: Reasonable & good faith efforts to implement COP7 have been made, monitored, audited, learnt from and improved over time. A summary audit report is published, including conclusions, in collaboration with scheme owner.</p> <p>OECD Step 5: Verification and annual reporting were in place, with required elements publicly shared (see Assurance Report). Additional public documentation highlighting the Member's commitment to responsible sourcing was available (see Quality, Environment and Safety section).</p> <p>Results/Outcomes – The Member has established accessible systems to understand and identify business partners and associated risks, assess and manage risks (if red flags are identified). The systems also support transparency, record-keeping, controls, identification of different types of materials (e.g. mined, recycled, grandfathered, as applicable), verification, monitoring and evaluation of improvements and public reporting on an annual basis.</p>
7.1b Due diligence for responsible sourcing from Conflict-Affected and High-Risk Areas	N/A	Not applicable to the Member's activity.
7.3a Due diligence for responsible sourcing from Conflict-Affected and High-Risk Areas	Conformance	<p>Commitments/Policies – Adequate internal and external material control systems have been established to reconcile movement of inventory in and out over a given time, for all material inputs and outputs.</p> <p>Efforts/Practice – A functional system has been established for the internal and external material control and reconciliation.</p> <p>Results/Outcomes – The system for internal and external material controls has been developed and actively implemented.</p>
7.3b Due diligence for responsible sourcing from Conflict-Affected and High-Risk Areas	Conformance	<p>Commitments/Policies – A process has been established for collecting and annually sharing information with the RJC on the types of gold sourced and, if applicable, mine of origin of mined gold received. Where applicable, a list of mines of origin for all gold received, the identity of any mines of origin in CAHRAs and a summary of the criteria used to determine CAHRAs was included.</p> <p>Efforts/Practice – The process of collecting and sharing information with the RJC on the types of gold sourced and, if applicable, mine of origin of mined gold received, was developed and in place.</p> <p>Results/Outcomes – The process of collecting and sharing information with the RJC on the types of gold sourced and, if applicable, mine of origin of mined gold received was timely, consistent and collated on an annual basis.</p> <p>During the audit period, the Member sourced mined gold.</p>

10 Community Development (10.1)	Conformance	<p>Commitments/Policies - There were adequate frameworks and approaches in place for regular discussion, consultation, and interaction with stakeholders and communities. The member demonstrated awareness of the requirements under national laws.</p> <p>Efforts/Practice – Adequate stakeholder and community engagement, stakeholder mapping and practical initiatives related to core business in place (e.g. trainings, employment and staff retention opportunities, investing in local financial institutions to support local procurement, educational programmes on natural resource management and monitoring, etc.) were in place.</p> <p>Results/Outcomes – The frameworks and systems for community development were appropriately implemented.</p>
11 Bribery and Facilitation Payments (11.1; 11.2)	Minor Non-Conformance	<p>Commitments/Policies - Written formal policies and procedures have been established. These prohibit bribery and corruption in the member's business practices and across the member's value chain. They protect employees from any penalty for disclosing such practices and have harsh penalties for violations. Procedures for accepting gifts from third parties were also in place. The Member has adopted a proactive approach to address corruption within their operations and supply chains.</p> <p>Efforts/Practice - These systems were implemented and functional, however the risk analysis on bribery was not formalised. The policies have been endorsed at the highest level and a senior manager was in charge of anti-corruption programme. Awareness raising programmes for its business operation, as well as dealing with complaints have been established. The policies and approaches are reviewed at least annually.</p> <p>Results/Outcomes - Systems have been developed and implemented for the Member's business operation, and across its supply chains to identify, train, record, raise concerns, investigate, and penalise for violation of anti-corruption policies, with the below lapse.</p> <p><i>Namely, the Member has not formalised the risk analysis on bribery (11.2a).</i></p> <p><i>Corrective action(s): The Member will formalise the risk analysis on bribery.</i></p>

The policies align with applicable laws in the areas required by this COP provision (e.g., Anti-Money Laundering (AML), The Financial Action Task Force (FATF).</p> <p>Efforts/Practice - Documented procedures were established with activities to support the 4 areas (verification, identification, checks and monitoring). The procedures described the process for reporting suspicious cash related activities to the proper authorities for cash records. A responsible person for implementation of KYC policy and procedures has been appointed. Training and regular reviews (at least annually) of the KYC policy and procedures was established.</p> <p>Results/Outcomes - The 4-step system in place, was appropriate to verify identities of business partners, identify high-risk counterparts, check records and monitor and report on suspicious transactions.</p>
13 Security (13.1;13.2)		<p>Commitments/Policies - There were adequate security policies and procedures in place that establish processes to identify structural and emerging security threats at various levels, and/or written policy or agreement on the conduct of security personnel.</p> <p>Efforts/Practice - A senior management function was in place for managing security risks for employees and other personnel, training, internal controls, regular consultations with stakeholders (government local enforcement, local communities) and monitoring the performance against the policies and procedures.</p> <p>Results/Outcomes - The policy for security risk assessments was appropriately implemented. A system has been established to identify security risks and address them. The policy that is used and applied is adequate and emphasises the need to respect human rights. Boundaries for security activities are set in contractual agreements.</p>
13 Security (13.3;13.4)	N/A	Not applicable to the Member's activity.
14 Provenance Claims (14.1; 14.2)	Conformance	<p>Commitments/Policies - Policies and procedures have been established to make and manage of claims, including for credible and evidence-based provenance claim.</p> <p>Efforts/Practice - Employees, suppliers and other business partners received training and/or were updated regularly, in particular employees who deal with the implementation of the provenance claim as part of advertising, marketing and other sales-related and relevant communication jobs. Control, reporting, and grievance mechanisms were adequately implemented.</p> <p>Results/Outcomes - The systems were appropriately implemented and used to identify, document, control, train, report, and address complaints related to provenance claims.</p>

		workers and proper and regular communication of policies, procedures, risks and operations was in place. Results/Outcomes - Relevant policies, procedures and systems have been appropriately implemented to handle, use, store, control, dispose, keep records and communicate risks of hazardous substances, including those which are subject to international bans and use of alternatives.
26 Wastes and Emissions (26.1; 26.2)	Minor Non-Conformance	<p>Commitments/Policies - Policies and procedures have been established to identify, monitor and control significant wastes and emissions to air, water and land generated in the member's business processes, with clearly defined roles and responsibilities. These align with relevant applicable laws and standards and COP Provisions 24 and 27.</p> <p>Efforts/Practice - Adequate environmental management systems to identify, manage and quantify significant wastes and emissions to air, water and land, were observed to be in place and aligned with COP Provision 24. Trends were being monitored over time and used to drive continuous improvement in environmental performance. The system adopted the 4R of waste management (reduce, reuse, recycle and recover, followed by disposal of any residual waste safely) and the mitigation hierarchy, as described under COP 24 (avoid or anticipate, minimise, restore and offset).</p> <p>Results/Outcomes - Relevant policies, procedures and systems for identification and management of significant wastes and emissions to air, water and land have been implemented, with some improvements needed as per below.</p> <p><i>Namely, the last analysis on incineration fumes has shown some improvements to be done (26.2c).</i></p> <p><i>Corrective action(s): An action plan will be implemented to comply with the Environmental department requests.</i></p>
27 Use of Natural Resources (27.1; 27.2; 27.3)	Conformance	<p>Commitments/Policies - Programs for the identification, monitoring and efficiency initiative(s) have been established for energy (including renewable) and water use, as well as other significant natural resources used (e.g. forest products and plastics). These align with relevant national frameworks, targets, and/or applicable laws (e.g. EU Directive 2014/95/EU to include non-financial statements in annual reports, as applicable) and COP Provisions 3, 24.1 and 26.</p> <p>Efforts/Practice - Adequate systems were in place to monitor energy (including renewable) and water use, identify other significant natural resources used (e.g. forest products and plastics) and enforce efficiency initiatives. The systems adopted the 4 steps to calculate and improve energy (including renewable) and water use in business operations (i.e. identification, prioritisation, implementation and review steps). A responsible manager has been appointed to implement initiatives.</p> <p>Results/Outcomes - The initiatives and the system to calculate and improve the use of energy (including renewable), water and the use of other significant natural resources have been appropriately implemented.</p>
